ISSUE 11

DX INFORMATION EXCHANGE 145.17 0130 WEDNESDAY

Dear Members,

I've had second thoughts regarding our social gathering during the Christmas season. Our group is only as good as its participation; and to find a Friday or Saturday night during December, that will suit the majority, is a tough order of business. Therefore, as we did last year, I think it would be in order to move our next meeting to a Saturday nite in January. At that time, we'll have a full blown dinner meeting with a program. More on that in our December bulletin. Of course, our 2nd get together in 1984 will be the Saturday nite of the Charlotte Hamfest.....
March 17th.

Tnx 'n I hope this meets with ur approval.

Ted Goldthorpe (WA4VCC)

NEW REPEATER

On November 5th eight hearty souls went up to K4LVV's summer retreat and installed a tower, antenna, duplexer and repeater amid the wind, snow flurries and 24 degree temperature. The repeater is now on the air and appears to be working quite well. Plans still call for the repeater to be moved to a slightly higher altitude in the spring. The frequency is 145.17 down 600. Many thanks to K4LVV, WD4JWO and AA4R. The repeater is for the exchange of DX info.

Forty feet of Antenna on a forty foot Tower.
